## **Outline**

- **Global landscape**
- **Focus on European landscape**
- **Open questions for discussion**

**Let's start with some good news...  
(on a global scale)**

## Projections 2025

85 million

97 million

### Growing job demand:

1. Data Analysts and Scientists
2. AI and Machine Learning Specialists
3. Big Data Specialists
4. Digital Marketing and Strategy Specialists
5. Process Automation Specialists
6. Business Development Professionals
7. Digital Transformation Specialists
8. Information Security Analysts
9. Software and Applications Developers
10. Internet of Things Specialists

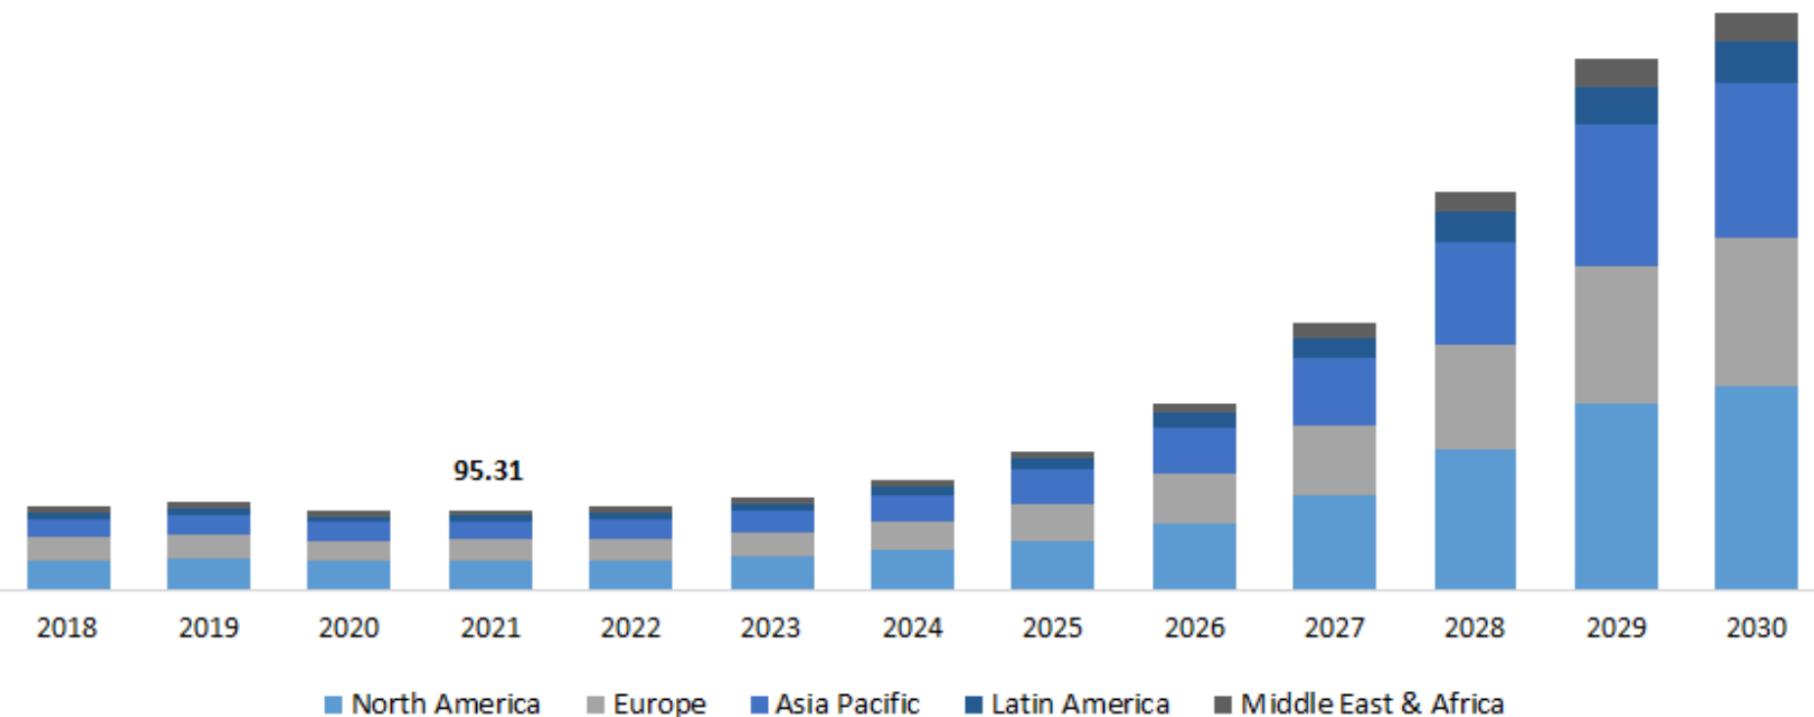

### Decreasing job demand:

1. Data Entry Clerks
2. Administrative and Executive Secretaries
3. Accounting, Bookkeeping and Payroll Clerks
4. Accountants and Auditors
5. Assembly and Factory Workers
6. Business Services and Administration Managers
7. Client Information and Customer Service Workers
8. General and Operations Managers
9. Mechanics and Machinery Repairers
10. Material-Recording and Stock-Keeping Clerks

Future of Jobs Report 2020, World Economic Forum.

statista

## Students are poorly informed

EXHIBIT 5 | Many Students Do Not Understand the Day-to-Day Work of Data Scientists  
*Share of students with good understanding (%)*

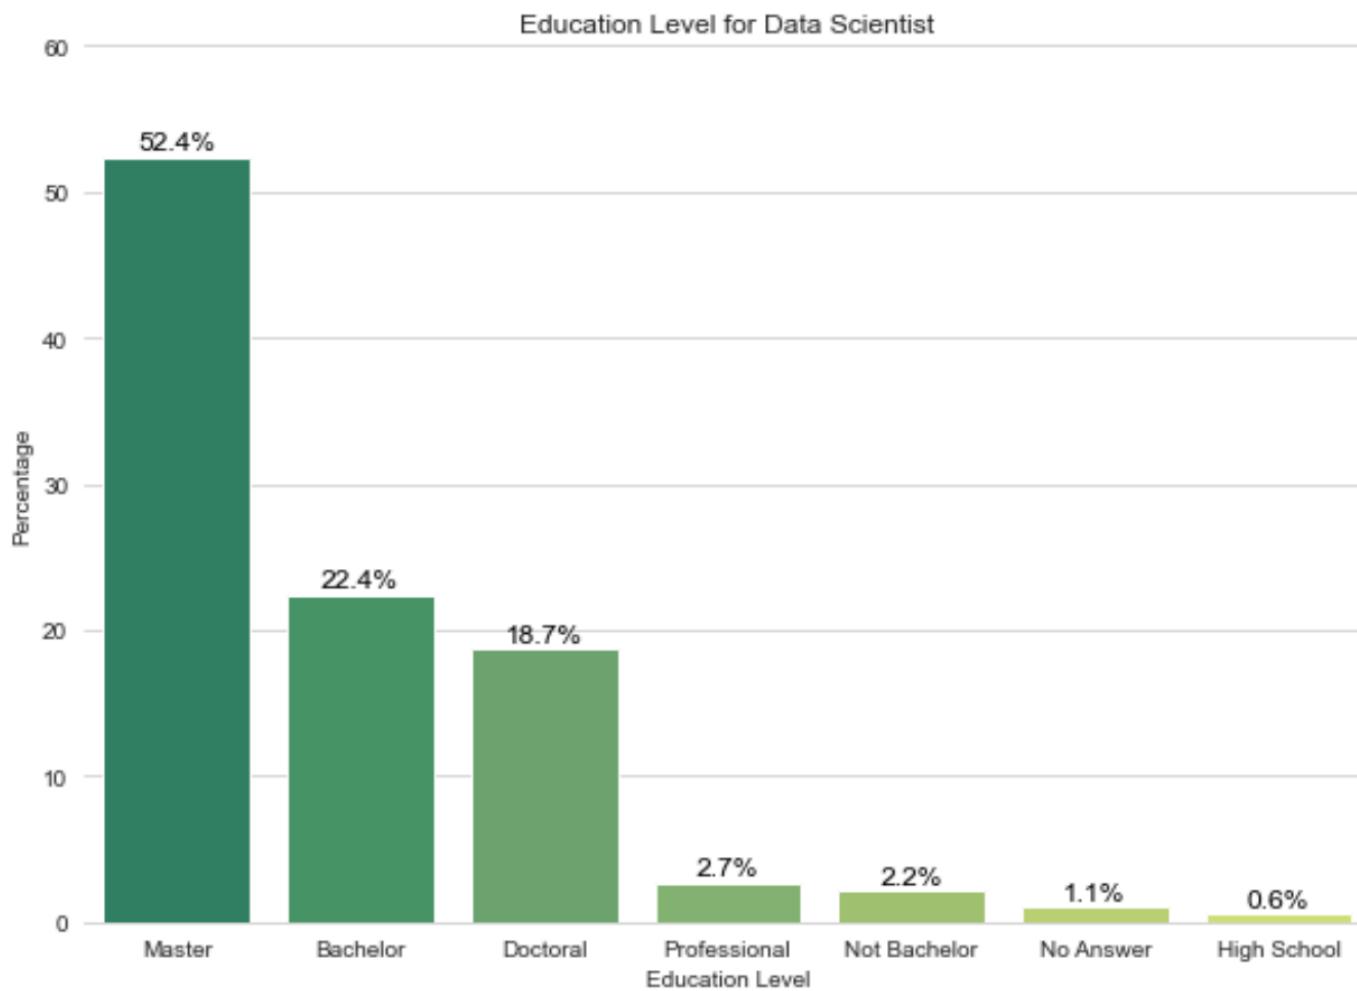

**Source:** BCG Women in Data survey 2020.

## **Open questions:**

**How to engage more female students?**

**How to better inform students about a career in data science?**

# **Educational landscape (global scale)**

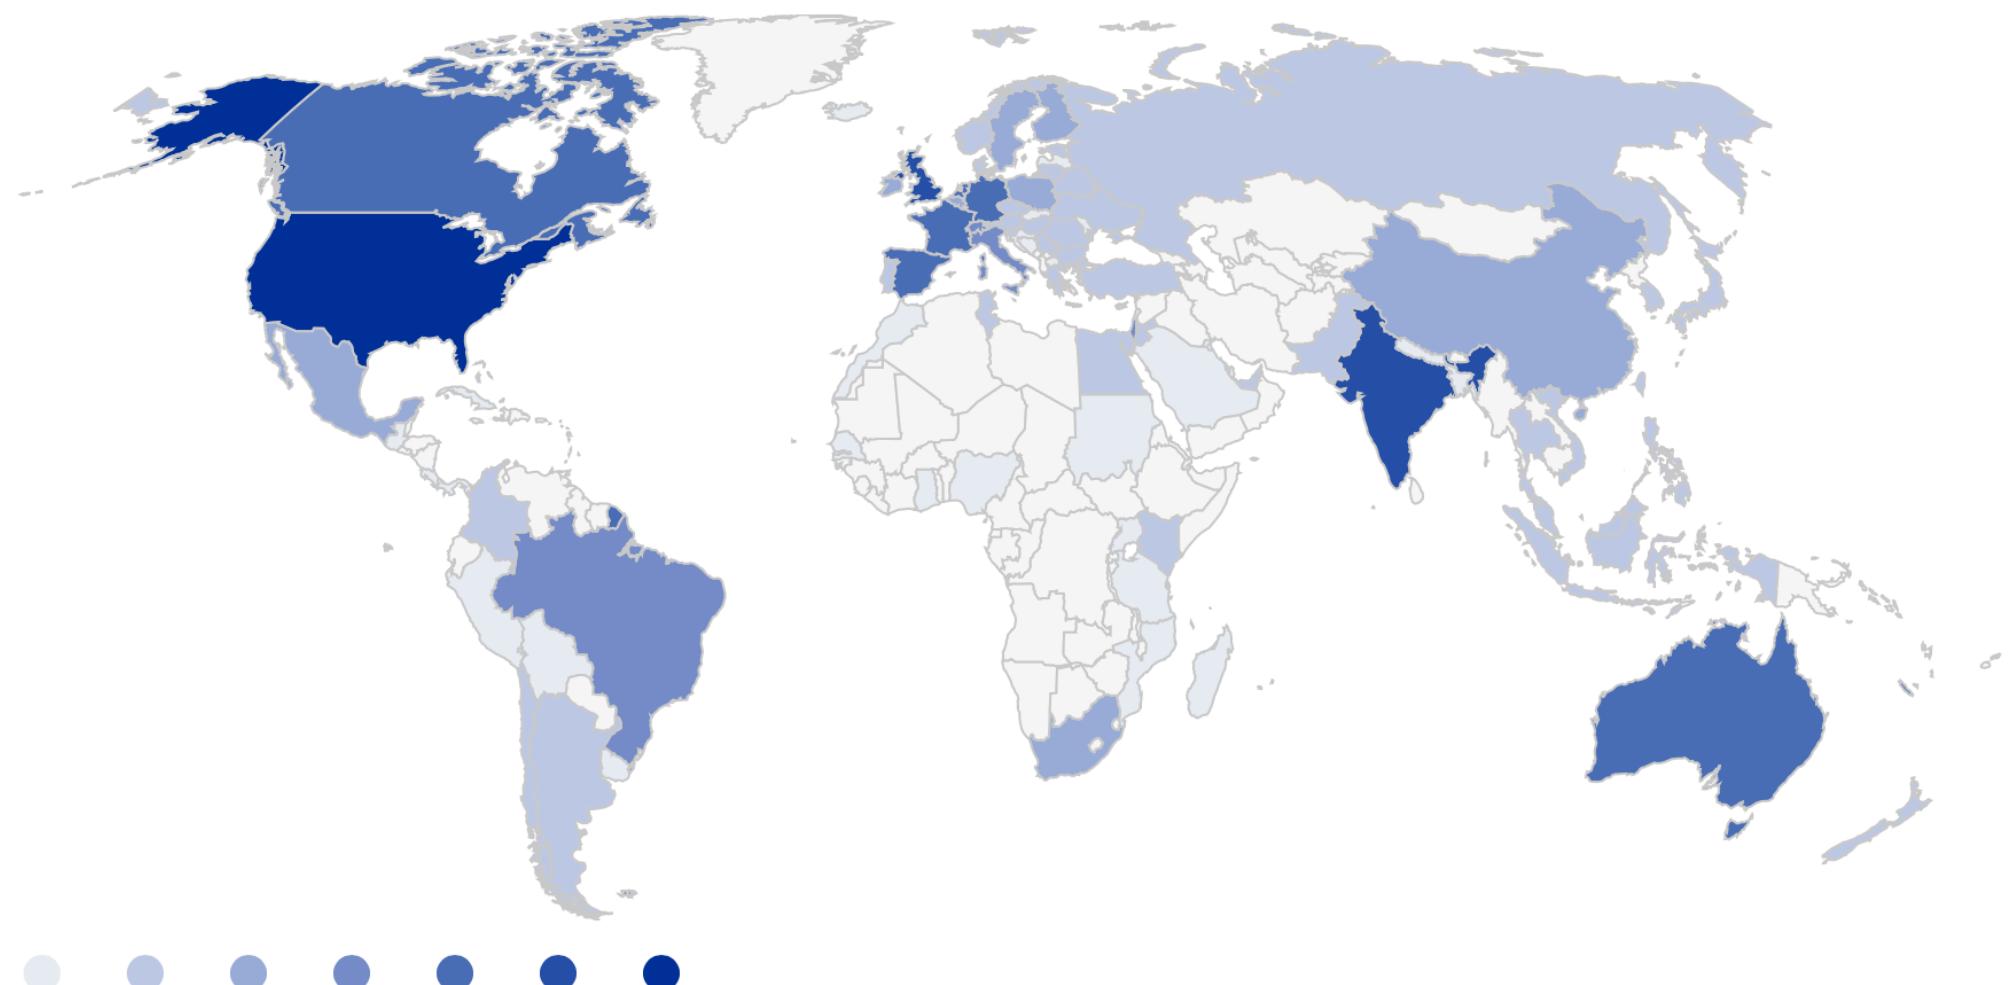

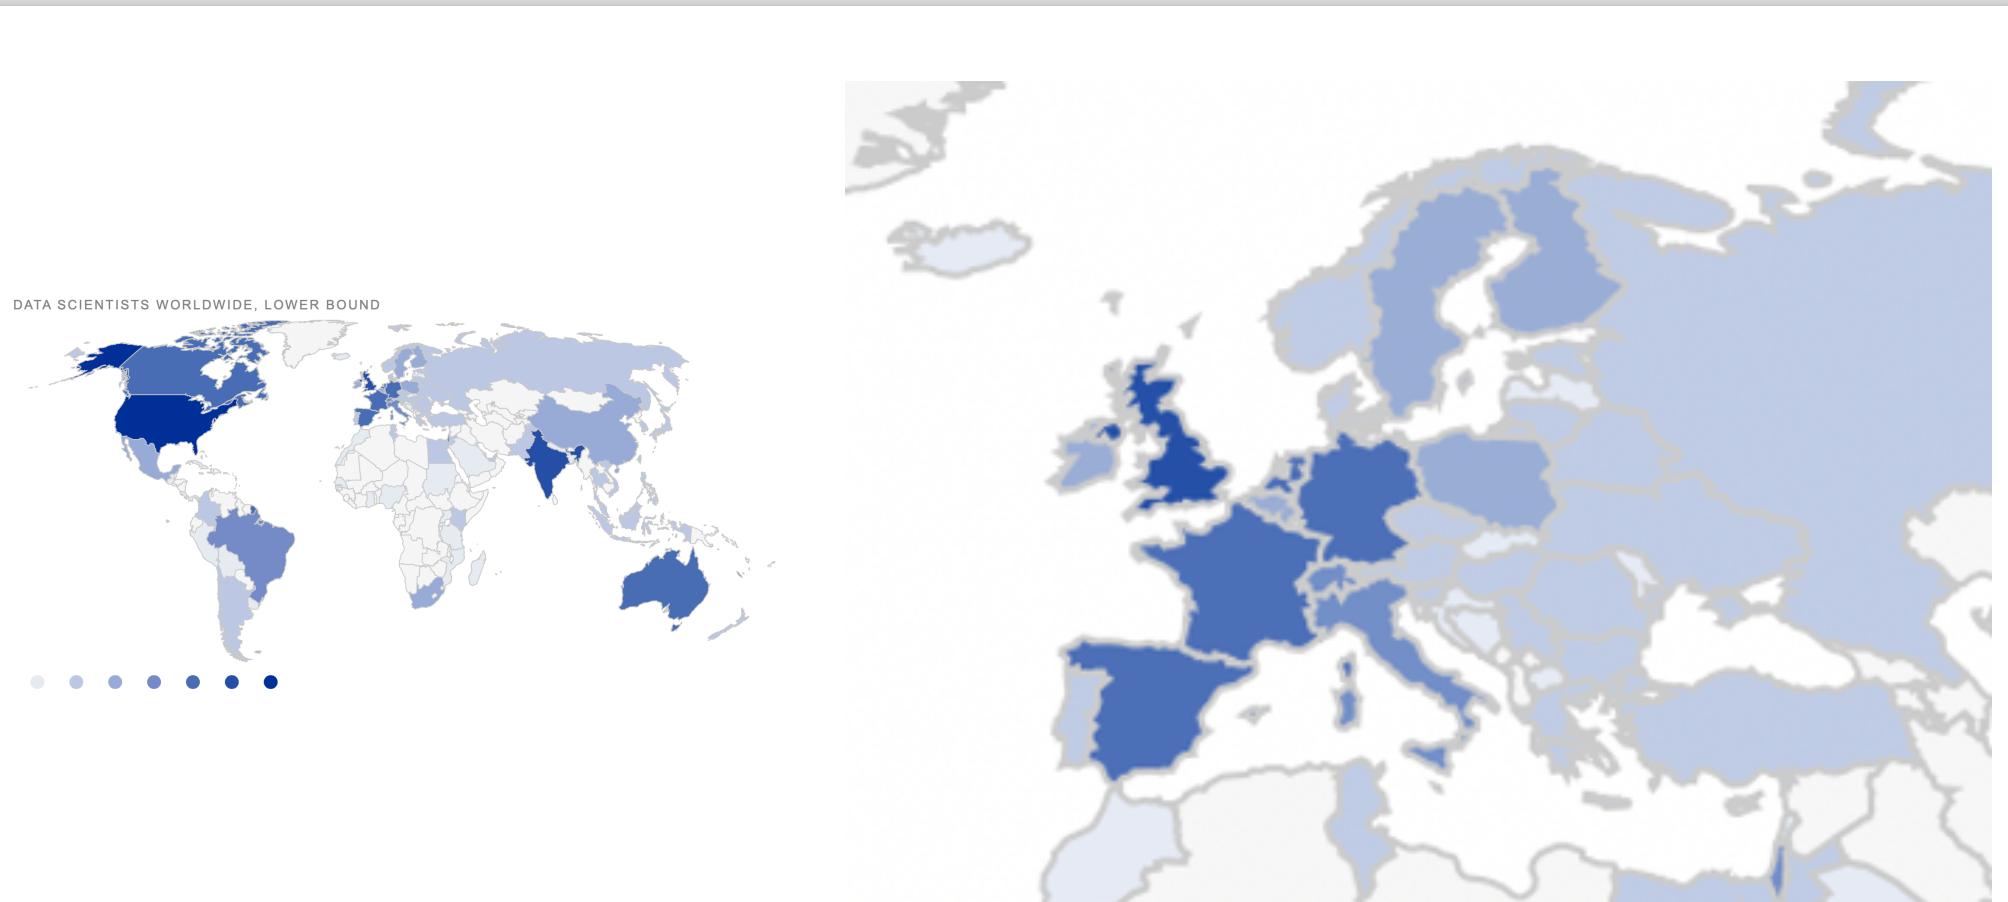

## Top 10 Backgrounds for People with Master's and Doctoral Degrees

Master's			PhD		
Rank	% of people	Field	Rank	% of people	Field
1	12.86%	Computer Science	1	14.74%	Physics
2	12.49%	Business Administration/ Management	2	14.46%	Computer Science
3	10.98%	Statistics	3	10.83	Mathematics
4	10.20%	Mathematics	4	8.24%	Statistics
5	8.54%	Physics	5	4.77%	Electrical Engineering
6	5.25%	Machine Learning/ Data Science	6	4.08%	Biology
7	4.50%	Electrical Engineering	7	4.06%	Machine Learning/Data Science
8	4.21%	Economics & Finance	8	3.25%	Computer Engineering
9	2.85%	Computer Engineering	9	3.09%	Neuroscience
10	2.48%	Biology	10	2.74%	Economics & Finance
	16.54%	All other fields		20.32%	All other fields
	9.10%	Not provided		9.41%	Not provided

# **Geographical landscape (global scale)**

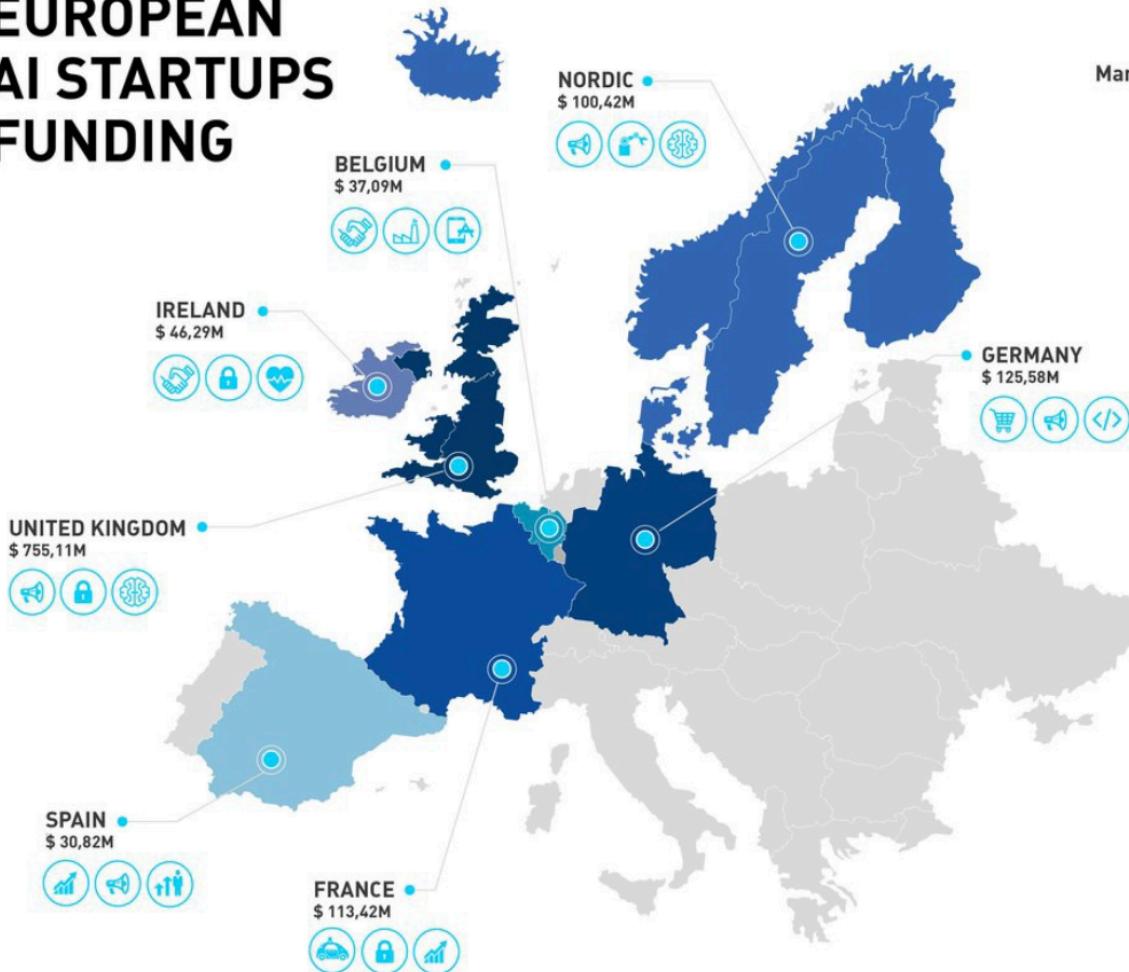

## DATA SCIENTISTS WORLDWIDE, LOWER BOUND

**Main Players:** UK, France, Spain, Germany, Italy, Switzerland, Netherland...

# EUROPEAN AI STARTUPS FUNDING

## MOST FUNDED AI SECTORS IN EUROPE:

Marketing/Advertising - \$ 273,06M  
Security - \$ 204,07M  
AI Tools - \$ 180,99M  
Healthcare - \$ 130,65M  
Retail - \$ 94,16M

# **Focus on Europe**

**In Europe (generally speaking),  
AI and Data Science are considered as two different fields**

**EU has a special focus on AI: [AI Flagship](#)**

### **Definition of AI**

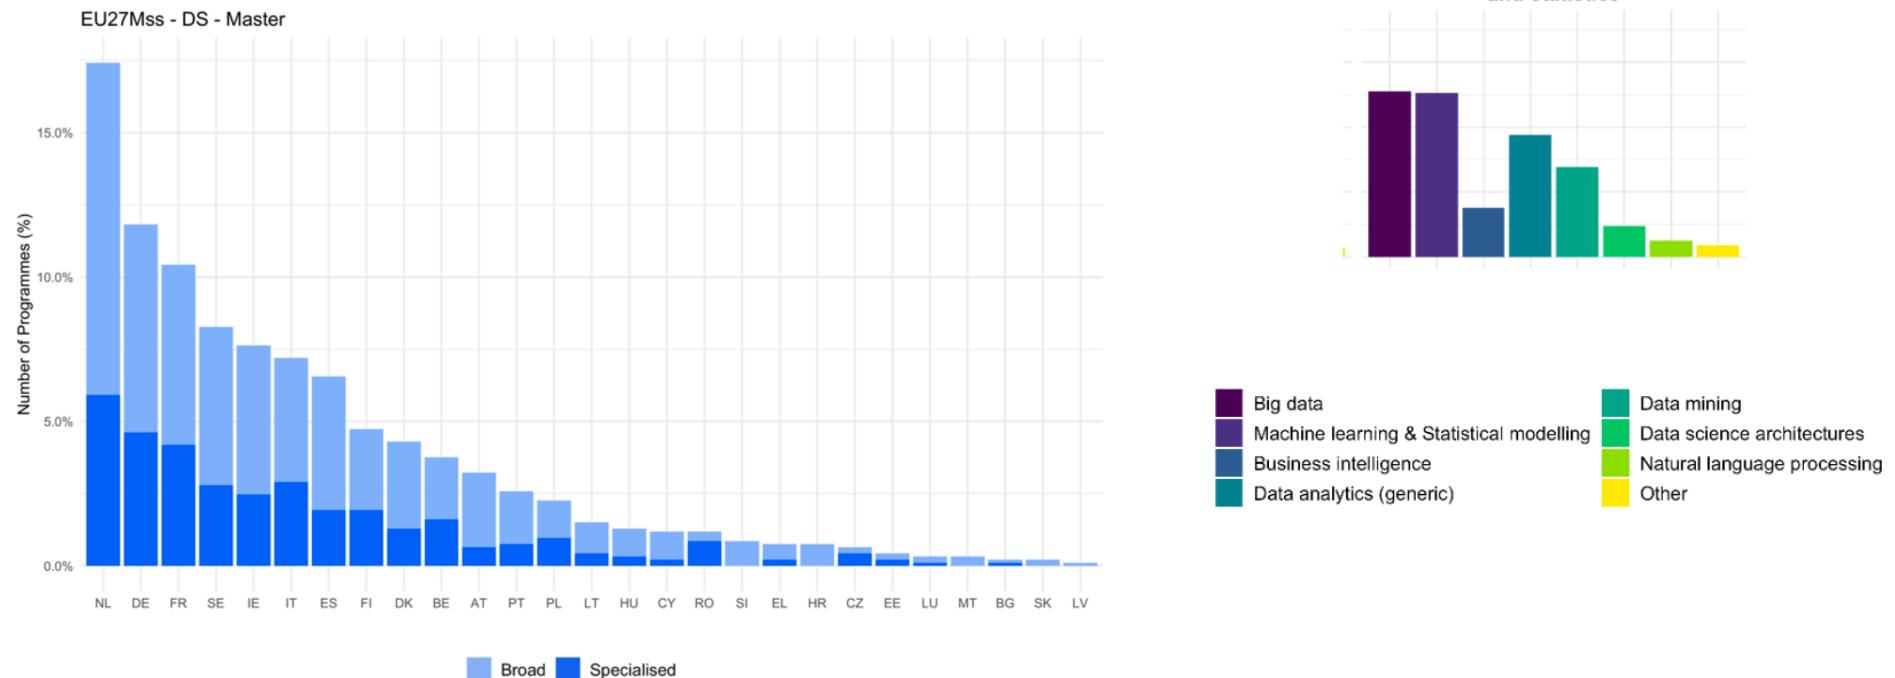

AI refers to any machine or algorithm that is capable of observing its environment, learning, and based on the knowledge and experience gained take intelligent actions or propose decisions. (Cit: [AI Flagship Report](#))

## **Open question:**

**Should Artificial Intelligence be included in Data Science or not?**

## Academic Offer Data Science\* in EU in 2019-20

Figure 29. DS master's programmes by Member State and scope (%). 2019-20

Note: The percentages are based on the number of programmes in each field of education in the EU27.

## **Keyword: Fragmentation**

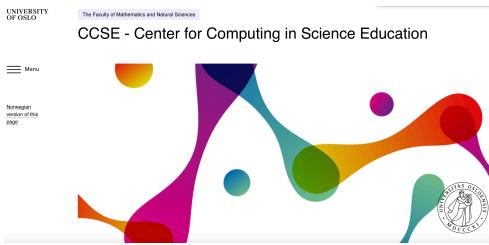

Europe needs a multi-national, pan-European, perspective and approach towards AI.

There is a strong need to pull together existing strategies in a cooperative way that will help grow the ecosystem across Europe without duplicating efforts.

If Europe does not combat fragmentation, there is a real risk of weakening the whole European ecosystem.

**European Commission 2018**

## In EU there is a lack of coordinated efforts (Fragmentation) Some examples of random efforts at personal level...

## **Interesting case study (European Medical Physicists (MPs))**

### **Expanding the medical physicist curricular and professional programme to include Artificial Intelligence (2021)**

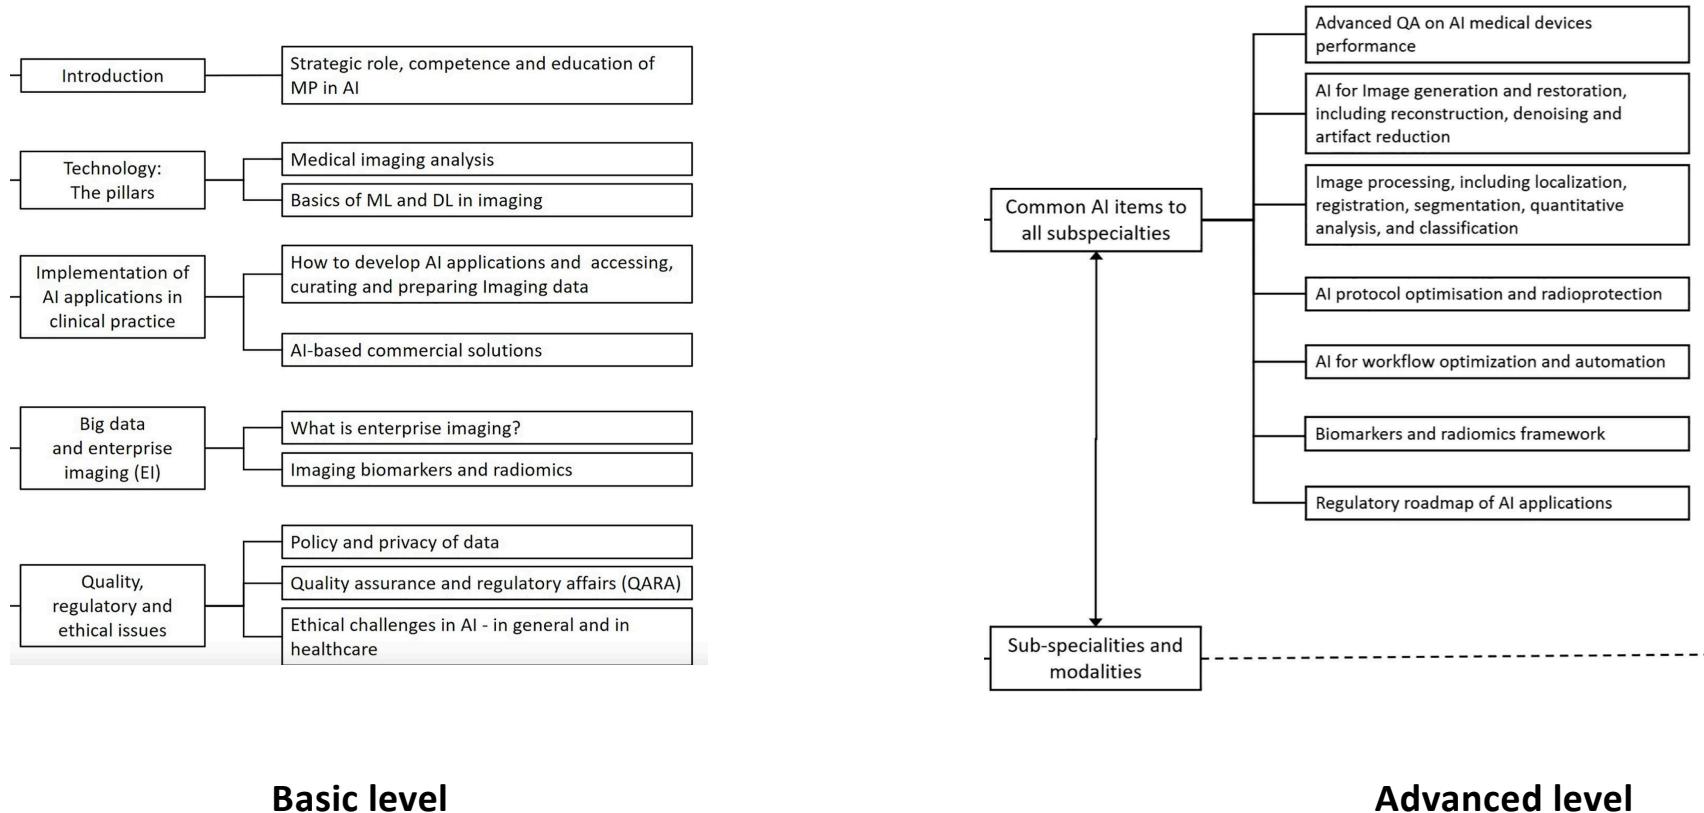

The European Medical Physicists (MPs) provides a guideline to incorporate Artificial Intelligence to the education and training in Europe and associated countries

Basic Level and Advanced Level

Examples: Medical imaging analysis and AI introduction, Implementation of AI applications, medical devices, radioprotection

<https://www.sciencedirect.com/science/article/pii/S1120179721000727>

# Proposed AI Training

## Interesting case study (European Medical Physicists (MPs))

Following MPs, in 2022,  
the **Australasian College of Physical Scientists and Engineers in Medicine**

encourage medical physics educators to develop a strategy to incorporate AI module in the curriculum.

They propose that

- (1) postgraduate medical physics programme should include a more comprehensive and well-structured AI module,
- (2) extending the medical physics education and training time and
- (3) inclusion of appropriate computer/data science experts in the curriculum delivery.
